

Interfor Elite KNOTTY BEVEL SIDING

Interfor Elite Knotty Bevel Siding adds a unique warmth and rustic charm to any home or cottage. It combines the exceptional beauty and outstanding performance of Western Red Cedar with our consistent manufacturing excellence. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

Interfor Elite KNOTTY CEDAR BEVEL SIDING

Best Choice for Appearance

Interfor Elite Knotty Bevel Siding offers the ultimate in quality appearance. Western Red Cedar has beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

Whether for a cottage, house or multi-family structure, Interfor Elite Knotty Bevel Siding is the grade of choice for quality builders. It is graded on all sides, and is available kiln dried to allow immediate finishing.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural oils act as preservatives and protect against decay and insects so harmful chemical treatment is not needed.

Best Choice for Quality and Performance

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite Knotty Bevel Siding is easy to saw and glue, and accepts nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Interfor Elite Knotty Bevel Siding features straight, even grain and uniform texture, and meets standards that set it apart from the competition, including:

- Knots are sound and tight only limited star checked or chipped knots are allowed.
- Spike knots are limited to a maximum of one half the width.
- There are no through holes or cut outs.
- The quality of our raw material means there are no permafused knots.

Size (inches)	Butt (inches)	Net Width (inches)	Tip (inches)	Pieces per bundle	Volume per unit	Lengths
¹¹ ⁄16 x 6	11/16″	5 ½″	1⁄8″	6	4,500 sm	6' - 20' O&E
¹ ½ ₁₆ x 8	11/16″	7 ½″	1⁄8″	8	4,500 sm	6' - 20' O&E
³ ⁄4 x 8	3⁄4″	7 ½″	5/32''	6	3,300 sm	6' - 20' O&E
³ ⁄ ₄ x 10	3/4''	9 ½″	5⁄32″	6	3,300 sm	6' - 20' O&E

* ¾" bevel is also available green (unseasoned).

Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world

- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at www.realcedar.com/ resources/brochures-literature/.
