

Treated Glulam Beams

Treated Glulam Beams are pressure treated with a Hi-Clear II, a clear industrial wood preservative. It leaves a light honey color finish that is virtually undetectable to the naked eye. It is intended for above-ground exterior applications and is most common for raised deck beams.

Features & Benefits:

- Allows for a one-piece install that meets code
- Treatment does not impact the structural integrity of the beam, meaning predictable and long-term performance
- Treated with a honey color stain, leaving a visually appealing and attractive beam
- Can be stained using an oil-based stain
- Helps you eliminate posts and columns, opening up lower level patios and yard space
- Easier to work with than steel - cuts, nails, and handles just like regular timber
