

Primed Radiata T&G Nickel Gap

Primed Radiata T&G Nickel Gap, often called Shiplap, is a pre-primed interior wall paneling. It is a tongue and groove product with a self-spacing 1/8" nickel gap reveal. This is a finger jointed product made of clear Radiata Pine blocks that are knot and void free. It is finished with two coats of an acrylic latex primer and the face is buffed for a smooth finish that is ready to paint immediately.

The primary face is a T&G Nickel Gap, and the backside is an optional V-Groove, however the priming finish on the backside is a "B" grade which may require some sanding and buffing. It is available in 1x6 and 1x8 and comes in prime 16' lengths. It can be installed horizontally, vertically, or on ceilings, and is an easy way to add character and texture to any room.

Available Sizes:

Item	Lengths	Exposure	Coverage	Grade	Finish
1x6 Primed Nickel Gap	16'	5"	240 LF/SQ	Clear FJ Radiata	Double Primed
1x8 Primed Nickel Gap	16'	6.75"	180 LF/SQ	Clear FJ Radiata	Double Primed

Features & Benefits:

- Perfectly clear face for a pristine smooth painted finish
- Custom designed tongue and groove with a perfect 1/8" nickel gap
- Long 16 foot lengths for complete ceiling and wall coverage
- A full 3/4" thick providing dimensional stability and rigidity
- Excellent for both walls and ceilings
- Soft and receptive wood that is carpenter friendly and easy to cut, miter, and nail
