

SOUTHERN YELLOW PINE DIMENSION LUMBER

Interfor is one of the top producers of dimension lumber in North America. Our Southern Yellow Pine (SYP) Dimension Lumber is a great choice for building, industrial and outdoor users — it is visually appealing and offers excellent dimensional stability.

Interfor Southern Yellow Pine

DIMENSION LUMBER

Best Choice for Performance and Quality

Southern pine species are renowned for their durability and versatility, and meet the needs of almost any project – from framing a house to building a deck.

Interfor SYP Dimension Lumber comes in a variety of visual and MSR grades with a wide range of dependable strength and stiffness properties. It offers a distinct grain pattern and appealing golden color, and is the preferred species for pressure treating because its cellular structure permits deep and even penetration of preservatives.

Interfor produces SYP Dimension Lumber at our six mills in Georgia – Baxley, Eatonton, Perry, Preston, Swainsboro, and Thomaston.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Southern Yellow Pine species grow across the southern United States from east Texas to Virginia. Our SYP Dimension Lumber all comes from forests in Eastern Georgia that are managed to meet Interfor's high environmental standards.

Technical Specifications

| Size (nominal) | Metric Size (mm) | Length | Pack Size | Grades | | | | | | | | | |
|----------------|------------------|----------|-----------|----------------|----|----------|------|----|------|------|------|------|------|
