

ValuForm - Bender Board

TruWood ValuForm flexible form boards are an engineered wood product designed for use in flatwork concrete forming applications. ValuForm installs easily and without special tools, providing time and labor savings when creating curved corners and intricate designs.

Available Size:

Item	Thickness	Size	Unit Size
12" ValuForm Bender Board	7/16"	12" x 16'	168

Features & Benefits:

- Radius capability makes it ideal for highly-curved forming designs such as walkways, patios, pool aprons, driveways and more.
- Suitable for temporary landscape applications.
- Can be used with grade stakes, flexible, not brittle.
- Lightweight and flexible, easy to install without special tools.
- 16 ft. lengths minimize joints.
- Multiple uses for less job waste, more cost effective than other bender board forming materials.

 PRODUCT	ValuForm
 SPECIES	Hardboard
 USAGE	Concrete Forming
