

# Log Cabin Siding

Log Cabin siding is a thick panel siding that mimics the look of old-world log cabin siding. It installs with a tongue and groove connection and is easy to install and cost-effective. It is an excellent option for country cottages, cabins, pool houses, and more.

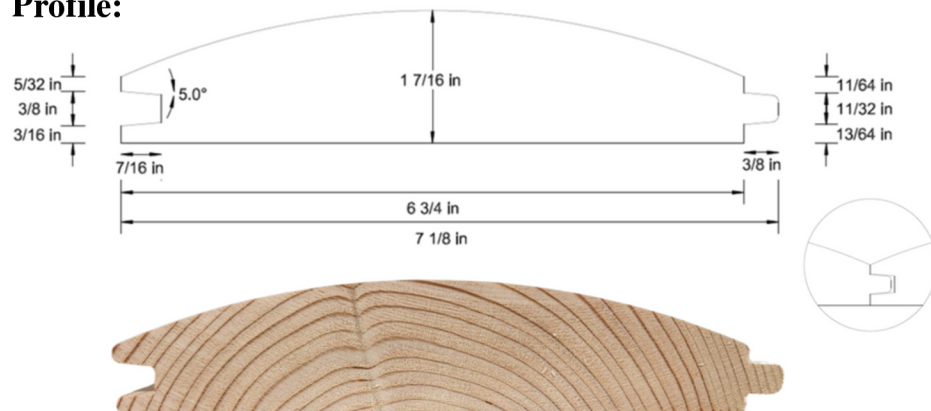

## Available Size:

Item	SKU	Lengths	Exposure	Coverage	Species
2x8 Smooth Round Log Cabin	28_FLCS	12' & 16'	6-5/8"	180 LF/Square	Fir & Larch

## Features & Benefits:

- Douglas Fir & Larch species that has natural oils, tannins, and resins that make it resistant to rot and decay
- Beautiful color and appearance. Easy to match with other Fir products like trim, timbers, and roof decking for a uniform look
- Features a slick 5 degree bevel on the tongue and groove that creates a easy install where the tongue smoothly fits into the groove without excessive force or hammering.
- Available in prime 12' and 16' lengths
